2151 BERKELEY WAY
BERKELEY, CA 94704-1011

(510) 450-3818

April 28, 1998

Dear Site Team Member:

The next Aerojet Site Team Meeting will be on **Tuesday, May 12, 1998 at 10:00 A.M.** at the Department of Toxic Substances Control, Region 1 offices on 10151 Croydon Way, Suite 3, Sacramento. Since our last site team meeting on December 12, 1998, another chemical, N-nitrosodimethylamine (NDMA) was discovered during sampling conducted by Aerojet. NDMA was found in extraction wells on the western side of the Aerojet property and in two domestic water wells in the Cordova Water Service operated by the Southern California Water Company. At the site team meeting it is planned that with Aerojet and the regulatory agencies in attendance, there will be a thorough discussion about the discovery of NDMA and how the contamination is being addressed.

Additionally, Dr. Underwood will discuss the status of the perchlorate health consultations which are currently being reviewed by the Agency for Toxic Substances and Disease Registry (ATSDR). She will also update us on the status of the health study to address perchlorate exposure in drinking water and neonatal thyroid hormone level and the dose reconstruction study.

If you would like to add an agenda item or have any other questions, please free to call me at (510) 450-3818 or e-mail me at cdhsjane@earthlink.net. I look forward to seeing you on May 12th.

Sincerely,

A handwritten signature in cursive script that reads 'Jane Riggan'.
